How can a business be authorised to perform electrical work in Finland?

For a business to be authorised to perform electrical work in Finland, it must: use the necessary measuring devices and other tools. have access to operational electrical safety regulations, standards and instructions. have either a business id in the Finnish Trade Register or an id equivalent to a Finnish business id.

What are Finnish electrical safety regulations?

The Finnish electrical safety regulations lay down three kinds of inspections: the commissioning inspection, the certification inspection and the periodical inspection. Installation work has to be inspected thoroughly by the installer. This commissioning inspection has to be done for all kinds of installation work whether large or small.

Where can I get a certification for electrical work in Finland?

The certificate of qualification (S1, S2 or S3) is issued by SETI Oy. If the appointed supervisor of electrical work holds a valid qualification from another EU country, SETI can typically issue the equivalent Finnish qualification with minimal additional requirements. For more details on applying for qualification, please visit SETI's website.

Why are electrical works regulated in Finland?

In Finland electrical works are for safety reasons regulated by law and law-related regulations. These regulations lay down binding requirements, which cover e.g.: how safety is maintained during electrical works. For a business to be authorised to perform electrical work in Finland, it must: use the necessary measuring devices and other tools.
