How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

Will Slovenia subsidize new self-sufficient PV energy communities?

The Slovenian Ministry of Cohesion and Regional Development has launched a EUR16 million program to subsidize new self-sufficient PV energy communities. The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement.

How much power does a photovoltaic system need in Slovenia?

The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement. "The total nominal power of the installed photovoltaic modules must be at least 100 kW, with or without battery energy storage systems," the authorities said.

How many PV installations did Slovenia have in 2023?

Slovenia recorded 400 MW of new PV installations in 2023, taking its total installed capacity to 1.1 GW, according to the latest figures from the Ministry of the Environment, Climate and Energy. This content is protected by copyright and may not be reused.

Due to strong interest, Slovenia has increased the available funding for community renewable energy projects from the original 16.1 million euros to 31.2 million euros for the 2025-2027 period.

Slovenia has launched a new public call, making a total of EUR60 million available for new investments in solar power plants and electricity storage. Eligible beneficiaries are legal persons, ...

In the latest effort to boost Slovenia's renewable energy goals, the Cohesion and Regional Development Ministry approved on Tuesday EUR 64.5 million in EU funding for new solar and wind power ...

Slovenia received 11.9 million euros in EU funding to support renewable energy projects, including photovoltaic systems and local energy communities, to boost electricity production and smart energy ...

Slovenia solar power generation solar panel subsidies

Slovenia selected a range of PV, battery storage and grid projects eligible for support via the European Union's Modernisation Fund.

The Ministry of the Environment, Climate and Energy launched a public call for cofunding under a mechanism for the modernization of energy systems in Slovenia and improvement of energy efficiency. It is ...

Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will ...

The Ministry of Environmental Protection, Climate and Energy plans three application openings for co-financing the construction of new solar power plants in public buildings and parking. 20 million euro ...

Solar panels photovoltaic power generation in Equatorial Guinea Specifically for Equatorial Guinea, country factsheet has been elaborated, including the information on solar resource and PV power potential country ...

The Energy Agency of Slovenia approved subsidies for 43 projects, of which 36 are for solar power plants with capacities from just 45 kW to 1.3 MW. The government covers the difference between the ...
