What is a solar water heater?

Solar water heaters--sometimes called solar domestic hot water systems--can be a cost-effective way to generate hot water for your home. They can be used in any climate, and the fuel they use--sunshine--is free. Solar water heating systems include storage tanks and solar collectors.

What is solar Stik®?

Solar Stik® configures portable power solutions built with precision and respect for the people who depend on their performance.

How does a solar water heater work?

Water is heated in a collector on the roof and then flows through the plumbing system when a hot water faucet is opened. The majority of these systems have a 40 gallon capacity. Most solar water heaters require a well-insulated storage tank. Solar storage tanks have an additional outlet and inlet connected to and from the collector.

What is a 40 gallon solar water heater?

The majority of these systems have a 40 gallon capacity. Most solar water heaters require a well-insulated storage tank. Solar storage tanks have an additional outlet and inlet connected to and from the collector. In two-tank systems, the solar water heater preheats water before it enters the conventional water heater.
