Should I clean my solar panels?

Cleaning your solar panels may seem like a chore, but the benefits far outweigh the effort: Clean panels can operate at optimal efficiency, maximizing energy production. Regular maintenance can help prevent damage and prolong the life of your solar investment. More energy production means lower electricity bills and a quicker return on investment.

How often should you clean solar panels?

Yes, you should clean your solar panels every 12-18 months to keep them performing well. Cleaning your solar panels makes sure that they're working as efficiently as possible. This is because dust and dirt can reduce the amount of sunlight that hits the panels. How often they should be cleaned depends on where your home is.

Do solar panels need maintenance?

Solar panel systems don't need much maintenance, but regular upkeep will keep them working efficiently for their full lifespan (up to 30 years). Here we look at the best way to clean your solar panels and keep them properly maintained. Do solar panels need cleaning?

Should I clean my solar panels if it rains a lot?

In many parts of the country, occasional rain is typically enough to naturally and safely keep your solar panels clean and free of debris that could lower their energy production. So, if you get a good amount of rain this year, you can likely skip a cleaning or two.

If you own solar or are thinking about it, one common question comes: how do you clean solar panels without hurting performance? Solar panels are built to last, but they still need care. Over ...
