Is Lenovo launching a solar-powered laptop?

Image: Lenovo From pv magazine Spain Chinese computer manufacturer Lenovo unveiled its new solar-powered laptop, Yoga Solar PC Concept, at last week's Mobile World Congress 2025 in Barcelona. Still in development, Lenovo describes the project as "a PC powered by the sun" that users can carry around anywhere with maximum flexibility.

Are solar-powered laptops a good idea?

Solar-powered laptops aren't necessarily new, but they're infamously heavy and expensive, making them niche products that don't have a lot of market share in the consumer laptop space. Lenovo hopes to change that with its Yoga Solar PC Concept, a laptop it says will have none of those drawbacks.

Which laptop has solar power?

The Wired reported that the Samsung NC215S(2011) was the first laptop to incorporate solar power. Currently, the Yoga Solar PC remains a concept with no production timeline announced.

What is the Lenovo Yoga solar PC laptop concept?

Here's everything you need to know about the Lenovo Yoga Solar PC Laptop Concept. How does it work? This laptop incorporates a solar panel with a solar energy conversion rate of over 24%, which Lenovo claims is one of the highest in the industry.
