AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California,...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility-scale solar ...

As part of the new airport's build, Daxing has an integrated project within it combining solar power generation with energy storage. This ensures a stable and sustainable energy supply for the airport, which ...

Megapack Delivers Megapack is making clean industrial energy storage more accessible and affordable. As the world adopts more renewable energy sources like solar and wind, batteries help balance supply and demand ...

California has emerged as the U.S. leader in solar-plus-storage, rapidly expanding both rooftop and utility-scale projects that pair photovoltaic generation with battery systems to store excess power for ...

KUALA LUMPUR, Malaysia, Feb. 6, 2026 /PRNewswire/ -- EVE Energy Co., Ltd. and its partners signed a contract for the Kuala Lumpur International Airport (KLIA) solar-plus-storage project, with ...

There are over 1,400 major energy storage projects currently in the database, representing more than 116,300 MWh of capacity. The list shows that there are more than 195 GWdc of major solar projects currently ...

The largest proposed solar and storage project to date in the U.S. just got the green light in Oregon, Electrek reported.

An "unbelievable appetite for clean energy" is pushing the developer of Gemini, the US's largest co-located

Solar power source signs large energy storage project

solar-plus-storage power plant, to pursue opportunities of a similar scale.

Estuary Power has secured \$340 million to build the Escape Solar project, combining 185 MW of solar with 400 MWh of storage. It will supply long-term clean power to major customers like MGM ...
