Support a decarbonized industrial sector with advanced concentrating solar-thermal technologies and develop affordable renewable fuels produced by solar energy.

The plant having last produced power in April 2019, NV Energy--the project's sole customer--terminated its contract in October 2019 on the basis of the project having "failed to produce."

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

Discover all statistics and data on Global solar thermal energy now on statista !

Concentrating Solar Power Update NREL is moving to 100-kW demonstration in an ARPA-E-funded 100-hour thermal energy storage project in sand. The technology has a 95% round-trip efficiency, ...

Through a systematic literature survey, this review study summarizes the world solar energy status (including concentrating solar power and solar PV power) along with the published ...

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

Fewer U.S. solar projects are reporting delays in their expected online date October 24, 2025

As of the end of 2021, the cumulative installed capacity of global CSP stations was 6,692 MW. Among China's first batch of demonstration projects, seven tower-type, one trough-type, and one linear ...
