Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.

Here, using OpenStreetMap infrastructure data, we present the first publicly available, spatially explicit, harmonised dataset describing global solar PV and wind turbine installations.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

You can change the suns positions for sunrise, selected time and sunset see. The thin yellow-colored curve shows the trajectory of the sun, the yellow deposit shows the variation of the path of the sun ...

View an interactive map or download geospatial data on solar photovoltaic supply curves.

Maps of solar resource and PV potential, by country or region, in ready to print files. East-west facing bifacial solar panels could boost solar power's economic value and help stabilise electricity prices ...

This information is drawn from GlobalData's Power Intelligence Center, which provides detailed profiles of over 170,000 active, planned and under construction power plants worldwide from announcement ...

Collection of solar data layers for the assessment of solar power projects.

With PVGIS, you have access to free sunlight maps that provide a clear and detailed view of the solar potential of any location worldwide. These maps, developed using reliable and up-to-date data, allow ...

Download free solar resource maps for 200+ countries. Ideal for a general overview of solar potential. For interactive site prospecting and bankable energy yield assessments, explore our professional ...
