How much does a Tesla Megapack cost?

Tesla Megapack online pricing tool. The company's pricing for a 1.9 MW/3.9 MWh Megapack is currently listed at \$1,039,290, which equates to \$266/kWh. This price does not include installation or delivery and requires a \$1,000 deposit to secure the order. In April 2023, the price of the same hardware was \$1,879,840, at a rate of \$482/kWh.

How many megapacks does Tesla produce a year?

Each facility is capable of delivering up to 40 GWh of Megapacks annually. Unlike its regular updates on vehicle production, Tesla does not disclose the volume of energy storage products manufactured each quarter. Instead, it reports on the revenue from products it can recognize, which coincides with when the battery packs are activated.

What is Tesla's Megapack capacity increase?

The capacity increase follows the initiation of operations at Tesla's Megapack assembly facilities in Lathrop, California, in 2022, and in Shanghai, announced in 2023. Each facility is capable of delivering up to 40 GWh of Megapacks annually.
