China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

A plan for the country's biggest solar project is moving ahead in California. If built, it'll power entire cities and millions of homes. Dan Charles reports on the farmers behind the project.

The \$2.2 billion Ivanpah solar power project in California's Mojave Desert is supposed to be generating more than a million megawatt-hours of electricity each year.

These projects, from solar-powered airports to pioneering solar flights, not only highlight the technological advancements in renewable energy but also underscore a collective commitment to ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Oak Run Solar Project, LLC plans to construct the proposed Oak Run Solar Project in Ohio. The project is a large-scale solar energy initiative developed on 10,000 acres of land north of ...

A lot of progress has been made - a boom in solar and wind energy projects pushed the world past 40% clean energy used in 2024 according to think-tank Ember. Carbon dioxide emissions, ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

The Great Project of Solar Power Generation

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.
