What is a blueprint holder & how does it work?

It's the perfect blueprint holder for any architect or construction professional, because it can store large documents in a portable case. It even has a labeling system, so you can keep track of all the documents you have on file.

Do you need a blueprint storage rack?

Construction sites often require blueprint storage racks that can be easily moved from one location to another. Similarly, architectural firms may need to relocate their storage racks during office renovations or expansions.

How do you store a blueprint?

There are several options when it comes to storing blueprints or other large documents. Shallow file drawers allow documents to be laid flat for storage. Roll files may take up less space and require blueprints to be rolled up and stored in upright or side-access cabinets. Portfolios, tubes and cases are some other options for blueprint storage.

Do I need a blueprint holder?

You need to have a blueprint holder that will allow you to transport them without wrinkling them. We carry all kinds of options -- from portfolio holders to blueprint drawing tubes. And if you need to mail or ship a design, we have a broad selection of boxes and bags. Feel free to browse through our selection.
