-----

We consulted several reports to determine which countries use the most solar energy and which parts of the world have the highest solar production capabilities.

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed ...

The countries that use the most solar energy are not always the sunniest. China, The United States, Japan, India, and Germany top the list for 2024.

Among the 21 metro areas we looked at in locations with at least 5,000 homes, we dug into the cities with the highest per-capita rate of solar panels. According to our analysis, below are ...

This blog post analyzes the global distribution of solar panels, highlighting the countries with the highest solar power capacity, the factors contributing to their success, and the potential for ...

Our rundown of the countries around the world using the most solar energy, from Mexico to China

Data from BP's Statistical Review of World Energy 2022 and the International Energy Agency's solar energy statistics reveal the countries that are at the forefront of global solar power capacity and ...

Explore which countries use solar energy the most and how global solar power adoption continues to grow across regions in 2026.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...
