There's a way to quickly jumpstart your cordless drill battery and get back to work in no time. In this blog post, we'll show you exactly how to do it. ...

In this video I will show you a really fast and easy way to fix and revive most dead portable tool batteries! ...more

What you may not realize is that a "dead" battery is often only ...

Your Bad (or Misinformed) Habits Are Killing Your Power Tool Batteries
Leaving Batteries on The Charger
Storing Dead Batteries
Completely Draining Batteries
Storing Batteries That Are Fully Charged
Not Storing Batteries Properly
Exposing The Battery to Extreme Heat
Not Protecting Them from Moisture
Not Allowing Them to Cool Down
Using The Wrong Charger
One of the most common ways DIYers kill their batteries" potential lifespan is by keeping them on the charger. This can cause overcharging, which will result in a drastically shorter usable lifespan. A better course of action is to remove batteries from the charger when they're ready and store them properly (more on that in a bit). See more on bobvila RD Batteries
7 Easy Ways to Maximize Your Power Tool's Battery Life
This guide will walk you through the essential strategies for maximizing your power tool batteries, from daily maintenance to long-term storage and advanced troubleshooting.

Tool battery power up

Quality batteries from leading brands charge up to five times quicker than regular ones, usually taking less than an hour. ...

Overcharging and excessively using a power tool can naturally cause the battery to heat up. But you're only adding fuel to the fire (no pun intended) when you excessively use your power...
