What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

Where is Wellington South Battery energy storage system being developed?

Wellington South Battery Energy Storage System is being developed in NSW, Australia. (Credit: Sungrow EMEA on Unsplash) The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW.

What is the Wellington Stage 1 grid-scale battery?

"The Wellington Stage 1 grid-scale battery represents a significant contribution to growing Australia's renewable energy capacity and strengthening its grid stability. Our partnership with Fluence will enable the delivery of competitively priced, reliable renewable energy to major Australian electricity users.

Which energy storage products will Fluence provide for the Wellington Bess stage 1?

Fluence will provide its full suite of energy storage products, including Gridstack and Mosaic, for the Wellington BESS Stage 1. Image: Fluence. Renewable energy developer Ampyr Australia has reached financial close on its 300MW/600MWh Wellington battery energy storage system (BESS) Stage 1 in New South Wales.

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a ...

Ampyr Australia, the local arm of Singapore-based developer Ampyr Energy, has achieved financial close for its 300 MW / 600 MWh Wellington stage one battery energy storage system project ...

This is the first battery we have contracted in New South Wales, and our share of Wellington Stage 1 is big enough to double the size of the customer volume we serve." The ...

Wellington grid-scale energy storage

The 300-MW/600-MWh Wellington Stage 1 project in Wellington, New South Wales, marks AMPYR's first grid-scale battery energy storage system (BESS) to reach financial close in the country.

Fluence Energy to deliver a 300 MW / 600 MWh battery storage system for AMPYR Australia's first grid-scale BESS project in Wellington, NSW.

The Wellington Stage 1 BESS is a 300 MW / 600 MWh grid-scale energy storage project in New South Wales, Australia. What products will Fluence provide for this project?

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, signaling a ...

The 300MW / 600MWh facility, located near Wellington, marks Ampyr's first grid-scale battery project to reach financial close in Australia. The system is expected to be operational in 2026 ...

AMPYR Australia has secured funding above A\$340m (\$221m) for its 300MW/600 megawatt hours (MWh) Wellington Stage 1 battery energy storage system (BESS) project in regional ...

Renewable energy developer Ampyr Australia has reached financial close on its 300MW/600MWh Wellington Stage 1 BESS in New South Wales.
