The construction of PV cell in manufacturing is a sequence of precision processes: crystal growth, wafering, surface texturing, doping, metallization, and assembly.

A total of 24 BiPV panels @ 8.4kWp will be used to construct the canopy, along with hybrid inverters and battery system to ensure a Zero Emission solution is achieved.

Selecting Solar Mounting Structures What Happens When Mounting Structures Fail? Ratedpower Can Help Design Your Ground-Mounted Solar Array Choosing the right mounting system for your project is a four-step process that involves selection, design, and installation. See more on ratedpower.
