What is a solar Kettle?

A solar kettle, sometimes known as a sun oven, is a portable solar-powered device that can cook hot meals and boil hot water, frequently to the boiling point or temperature. Some solar-powered kettles on the market are only fueled by electricity required by the sun, while others include lithium batteries as backup energy sources.

How do solar-powered kettles work?

Some solar-powered kettles on the market are strictly powered by the sun, while others have backup energy methods in lithium batteries. You would consider your needs and geography and determine which would work best for you. These solar kettles can come in various sizes to accommodate different amounts of food and liquid.
