-----

Researchers at ORNL, in collaboration with partner universities, have developed a suite of technologies to enable the resilient operation of networked microgrids. These include advances in protection, ...

It will be a "fully-integrated innovation center for decentralized energy systems," focusing on microgrid innovation, education, and component certification. The laboratory boasts an impressive ...

It will function as a technology and business development laboratory to complement the state's mandate to reduce and eventually eliminate the use of fossil fuels for energy production and ...

HONG KONG SAR - Media OutReach Newswire - 5 February 2026 - The Hong Kong University of Science and Technology (HKUST) and Intel Corporation (Intel) announced the ...

NLR is collaborating with the San Diego Gas & Electric Co. to model a microgrid in Borrego Springs, California, and evaluate how a microgrid controller with advanced functionality ...

The Microgrid Systems Laboratory (MSL) is a fully-integrated innovation center for decentralized energy systems.

Microgrid Controls NLR develops and evaluates microgrid controls at multiple time scales. Our researchers evaluate in-house-developed controls and partner-developed microgrid ...

MSL's research activities focus on collaborative approaches to key scientific and technical issues in distributed energy systems. Collaborators include members of the MSL Research Network and ...

As utility microgrids integrate more renewable energy generation, it is important to assess how inverter-based resources (IBRs) contribute to microgrid stability and resilience.

The Microgrid Systems Laboratory is a collaborative effort to speed the transition to a more resilient,

# What is the Microgrid Joint Laboratory

sustainable, and equitable electricity system. Microgrids are community-scaled smart energy ...
