What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

What type of inverter do solar panels use?

On-grid inverter: Most small-scale solar panel installation systems use an on-grid inverter, also known as a 'centralised' inverter. These solutions are the most commonly installed inverters. The DC (direct current) electricity generated by the solar panels is plugged into this inverter.
