What is a solar generator?

Solar generators are the ultimate solution for portable, quiet, and free renewable power. Perfect for keeping your home running during blackouts or powering devices on your off-grid adventures, solar generators harness the sun's energy to provide clean, reliable electricity wherever you are.

How does a solar power motor work?

A solar power motor works by being powered directly by solar panels. The motor's performance parallels the voltage and current levels provided by the solar panels, which increase during the day and drop to zero at night. MET Motors has duplicated this performance and delivers these motors locally.

What is included in a solar generator?

Each solar generator includes a charger, solar panel cables, and is backed by a manufacturer warranty and lifetime customer support. Take control of your energy needs with a sustainable and cost-effective power solution that delivers freedom and flexibility.

Where are solar powered DC motors made?

MET Motors manufactures all of its Solar Powered DC Motors in our plant in Winnebago, MN since 1969. If you have an application for a Solar DC Motor, just send us your specifications and we will be glad to send you a no obligation quote.
