Can wind turbine blades be carried on deck?

Carrying wind turbine blades on deck can reduce the visibility from the ship's bridge. The IMO's bridge visibility requirements are set out in the SOLAS Convention and any non-compliance with these will be a breach of a statutory requirement, which may prejudice Club cover.

Where can I ship my wind turbines?

DSV has offices and representatives all over the world. With this global network and set-up, you have access to the know-how and vessels you need to move and ship your wind turbines wherever they need to be safely and efficiently - whether that's an individual wind turbine, a blade or a turnkey solution for on- or offshore wind farms.

What services does a wind turbine company offer?

Our wind turbine transport and deployment services include: Specialised transport and logistics - including route surveys and multimodal transport of blades, towers, nacelles and foundations. Tools and equipment: provision of handling gear, lifting tools and custom-designed transport frames.

Which countries offer wind turbine transport?

20. Philippines (162 MW) 21. Vietnam (85 MW) 22. India (16 MW) 23. Japan (42 MW) Let one of our dedicated experts within Renewables and Wind Logistics handle your request. Use the formular to contact us. Looking for expert wind turbine transport? We offer end-to-end logistics for turbines, blades, foundations and solar panels.

Expertise in regulatory compliance Contract bid assistance Wind turbine logistics We understand the complexities involved in moving wind turbines, blades and components and have the experience you ...

(877) 792-5056 - Wind turbines can't function without their blades. Whether it's a new or used wind turbine blade, we will help you ship it.
