Did Chinese EV imports surge in 2024?

In Indonesia, after import duties were waived under local investment requirements, Chinese EV imports surged to reach two-thirds of the country's EV sales in 2024, up from about 10% in 2023.

What drove EV battery demand in 2023?

Demand was largely driven by growth in EV sales, as demand for EV batteries grew to over 950 GWh - 25% more than in 2023. Electric cars remain the principal factor behind EV battery demand, accounting for over 85%.

Will EVs save energy in China?

Across all vehicle modes, the deployment of EVs replaces the use of more than 5 million barrels of oil per day globally in 2030, an important energy security consideration. Half of these savings are the result of EV adoption in China.

What is the contribution of electric trucks to EV battery demand?

Notably, the contribution of electric trucks to EV battery demand triples by 2030 to reach more than 8%, up from nearly 3% in 2024. developing economies; AEs = advanced economies. Battery demand is defined here as the volume-weighted average battery size multiplied by vehicle sales by mode and region.
